

Serious Tools for Professional Baristas, HANDMADE IN FLORENCE

the Company

www.lamarzocco.com

La Marzocco had its beginnings in Florence, Italy, birthplace of the Italian Renaissance and home to such geniuses as Leonardo da Vinci, Michelangelo and Brunelleschi who created some of the most celebrated works of art in the world. It seemed only fitting that the city would witness the creation of yet another splendid work of art: La Marzocco. Founded in 1927 by Giuseppe Bambi and his brother Bruno, La Marzocco gained the reputation throughout Tuscany for making beautiful, high quality, superbly crafted and uniquely designed espresso machines, with great attention held to detail. It was La Marzocco that developed and patented the first horizontal boiler in 1939, today an industry standard and the first of many important innovations, one of which the dual-boiler technology with saturated brewing groups.

Over the years La Marzocco has received many awards of merit such as: the "Prize for Quality and Courtesy", the "International Andino de Fomento" and the "Diploma of Collaboration" at the Decorative Art Show of the Triennale of Milan. Tradition and passion in the search for quality and superior reliability have always been an important part of the company. Highly qualified staff oversee, step by step, the production of every single machine, hand-crafted to order for each and every client. In this way, Giuseppe Bambi's great experience and professional pride have continued for almost eighty years.

La Marzocco strives to remain an artisan company while still offering important advancements in equipment technology. At the same time it enjoys sharing its history and continues to welcome all those who are passionate about good coffee. Its aim is to always improve brewing technology and to further expand its undisputed leadership in quality in the cup, which is already known in over 50 countries around the world.
